**M. J. Coaters Pvt. Ltd.**

PVDF Coating, Super Durable Powder Coating & Wood Finish Coating

M.J. GROUP is a well-known name in the field of Powder Coating, PVDF Coating and Wood finish coating has introduced International Quality Architectural Coating in India. M.J. Group was incorporated in 1986 and has since then been operating in the field of Coating Application. The coating application done at our "State of the Art" ISO 9001:2008 certified plants is at par with the International Standards and Quality Management System.

**"MJ Wood"** is a brand name with 10 (ten) year Exterior Warranty for the applied products.

M J Coaters Pvt. Ltd. has an advanced technology of plant and machinery with fully equipped, automatic, PLC controlled system to supply a quality decoration of the wood finish to our valuable customers.

The Wood finish decoration is achieved by using special type of polyurethane powders which are approved by Qualicoat & AAMA standards electrostatically spray on the surface of the products and later sublimation film approved by QUALIDECO is vacuumed over the powder coated products. The products then cured in the oven where sublimation takes place. The finished products thus meets the Qualicoat & Qualideco standards which also passes, salt spray, UV Resistance tests enhances to super durability of the product provided with 10 years exterior warranty.

We are the authorized approved applicators in India for European experts, Jotun, Akzonobel, Memphis supplying good quality Polyurethane powders to ensure top quality decoration & Goal

Architectural building materials such as Curtain walls, structural glazing, Aluminium sheets, Extrusion doors & window, louver system, Modular kitchen cabinets, Furnitures, Railings, Gates, Interior decoration items, 3D objects etc are the area in which we are experts. Our confidence in our product reliability makes us a pioneer in giving coating performance.

**M.J.Wood**

# State Of The Art Coating Plant

- MJ Wood Warranty: 10 years
- Advance technology of Pre-Treatment process with transporter system
- Highly equipped ,Fully Automated / PLC Controlled plant to ensure quality decoration
- Facility to do wooden finish coatings up to lengths of 8.0metres sections. (The biggest capacity in the country)
- Powder: The powders we use for Wood Finish coatings are Polyurethane based powders, Our partners for supply of powders are global companies like Akzo Nobel, Kansai Nerolac and Jotun, that are Qualicoat approved thus helps us ensure top quality.

Sublimation Films: Our Italian partners Memphis/ Miroglia are the leading suppliers worldwide for Wood finish sublimation film.

- Decoration/coating meets Qualicoat/Qualideco standards
- Application standards at par with AAMA
- Experienced & dedicated workmanship to achieve quality decoration Goal
- State of art laboratory.

## Advantages

- It can be applied over more types of extrusions, sheets, 3D objects
- Ecofriendly, saves trees, Healthier working conditions,
- Easy-to-use technology (It is easy to fabricate & install).
- Minimum/easy maintenance required, Lesser safety costs,
- As the coating is done over Aluminium/metal, it can be recycle

### Plant Area
